1. The subject matter of claim 1, concerns a system for retrieving motion picture, comprising a motion picture segmentation means for segmenting motion picture temporally, a motion picture shape descriptor abstracting means for abstracting a motion picture shape descriptor from the segmented motion picture, and a motion picture metadata storing means for storing the motion picture shape descriptor as metadata. D1 does not explicitly disclose a motion picture segmentation means for segmenting motion picture temporally but discloses video segmentation means. D1 also discloses a shape-based image retrieval. Therefore, the subject matter of claim 1 lacks novelty in the sense of Article 33(2) PCT and does not involve an inventive step according to Article 33(3) PCT.

2. The subject matter of claims 8-11 concerns a system for retrieving motion picture including a motion picture retrieving means for calculating the similarity between the first motion picture shape descriptor abstracted from the motion picture shape descriptor abstracting means and a second motion picture shape descriptor outputted from the motion picture shape descriptor metadata storing means. D1 discloses a video segmentation means and a shape descriptor abstracting means and D2 discloses a method for calculating the similarity between two objects. Therefore, the subject matter of claims 8-11 does not involve an inventive step according to Article 33(3) PCT.
